Water exchange: Every two weeks, remove the water from the pan, clean the pan with a mild detergent and refill it with 1.5L of autoclaved osmotic water

Incubator cleaning: Every month, clean the incubator with 70% ethanol

H₂O₂ decontamination: Upon contamination in the incubator, decontamination with H₂O₂ can be performed

Remarks: Include in this section any comment you might have regarding the status of the incubator. In case of H₂O₂ decont., explain the reason for decont.

For more information on the cleaning and decontamination processes, refer to the How-to card
